CONVENTIONAL

This conventional cooking method involves the heat emanating evenly from the lower and upper elements into the oven ensures even cooking of the lower and upper side of the food being cooked. This function is perfect for cakes, pastry, baked pasta, lasagne and pizza.

FULL GRILL / MEDIUM GRILL

Full grill is the perfect option for quick grilling. Toast your favourite meals or finish off the tops of your recipes.

DEFROST

In defrost mode, only the fan is activated to circulate air inside the oven for defrosting. (No heating elements are used) defrosting food up to 30% faster than traditional methods

THERMO-WAVE FAN ASSISTED

This is the position where the heat is coming from the lower and upper heating elements and the heat is circulated into the oven by the fan motor and blades.

OVEN LIGHT

The oven light will automatically turn on once any function is selected, helps to monitor the progress of your cooking.

FAN FORCED COOKING

For the ultimate roast or perfect batch of pastries. The element surrounding the fan delivers even heat for even cooking results, approx. 160°C - 180°C is recommended

FAN GRILL

This function is perfect for fish, chicken Fillets or meat Cutlets. This Combination is exceptional for cooking meats such as poultry, game and roasts.

BOTTOM ELEMENT

Great for pizza cooking, the bottom element creates the perfect cooking function for base cooked food.
